### Umoplast Super ZN Precision Nutrition

Umoplast ZN is a micro granulated fertilizer containing around four million granules per kg which means it has an extremely high interface with your seeds, providing all important nutrients quickly and safely.

5g of Umoplast:  
approx 25,000 micro-granules  
90% between 0.5-1.0mm

5g of 18:46:0  
approx 200 granules  
2.5-4.0 mm

For maximum uptake, nutrients need to be available close to the root. This is especially true of phosphate, as shown in the diagram. With a composition of 11:50:0+1ZN, Umoplast Super ZN places essential nutrients exactly where the plant needs them.

#### Maximum distance root capacity nutrient uptake

Umoplast Super ZN provides a freely available combination of nitrogen and phosphate in a ratio of 1:5 which encourages early root growth and development.

**Get your oilseed rape  
off to a  
flying start**

**UMOSTART SUPER ZN**  
**PRECISION NUTRITION FOR 21<sup>ST</sup> CENTURY**  
*Time to rethink your fertilizer strategy*

## Oilseed Rape Establishment The Basics

Oilseed Rape is drilled when soil temperatures are at their highest and soil moisture levels at their lowest but whatever your chosen method of planting, before winter sets in the aim is to achieve large deep rooted plants which provide good ground cover.

No two seasons are the same, so what can you do to minimise the risk of poor crop establishment and get your crop off to a flying start?

Umoplast Super ZN precision nutrition is a new generation seedbed fertilizer, designed to maximise rapid establishment of your oilseed rape crop.

Umoplast Super ZN is applied in bands at the time of drilling, providing precise nutrition to your seedlings where and when they need it, replacing conventional, less efficient seedbed fertilizer regimes.

Umoplast Super ZN encourages rapid root growth and development, giving your plants every chance of meeting that all important winter deadline, whatever the weather.

Umoplast Super ZN precision nutrition is a significant aid to achieving maximum production potential from your crop.

## Application Technology

Umoplast Super ZN is simple to apply whatever your system of crop establishment.

### Till Seeding Systems

Umoplast Super ZN can be applied via an additional micro applicator unit mounted on your subsoiler to compliment an existing seeder unit.

### Drilling Systems

Umoplast Super ZN can be applied through many conventional drills, usually by the addition of an ancillary OEM unit, or alternatively by a micro applicator fixed directly to the drill or toolbar.

Umoplast Super ZN is packed in easy-to-handle, high quality 10kg foil bags and because it is applied precisely, you only need to use 10-20 kg/ha, which saves you time and is kinder to the environment.
