

# Umoplast Super Zn

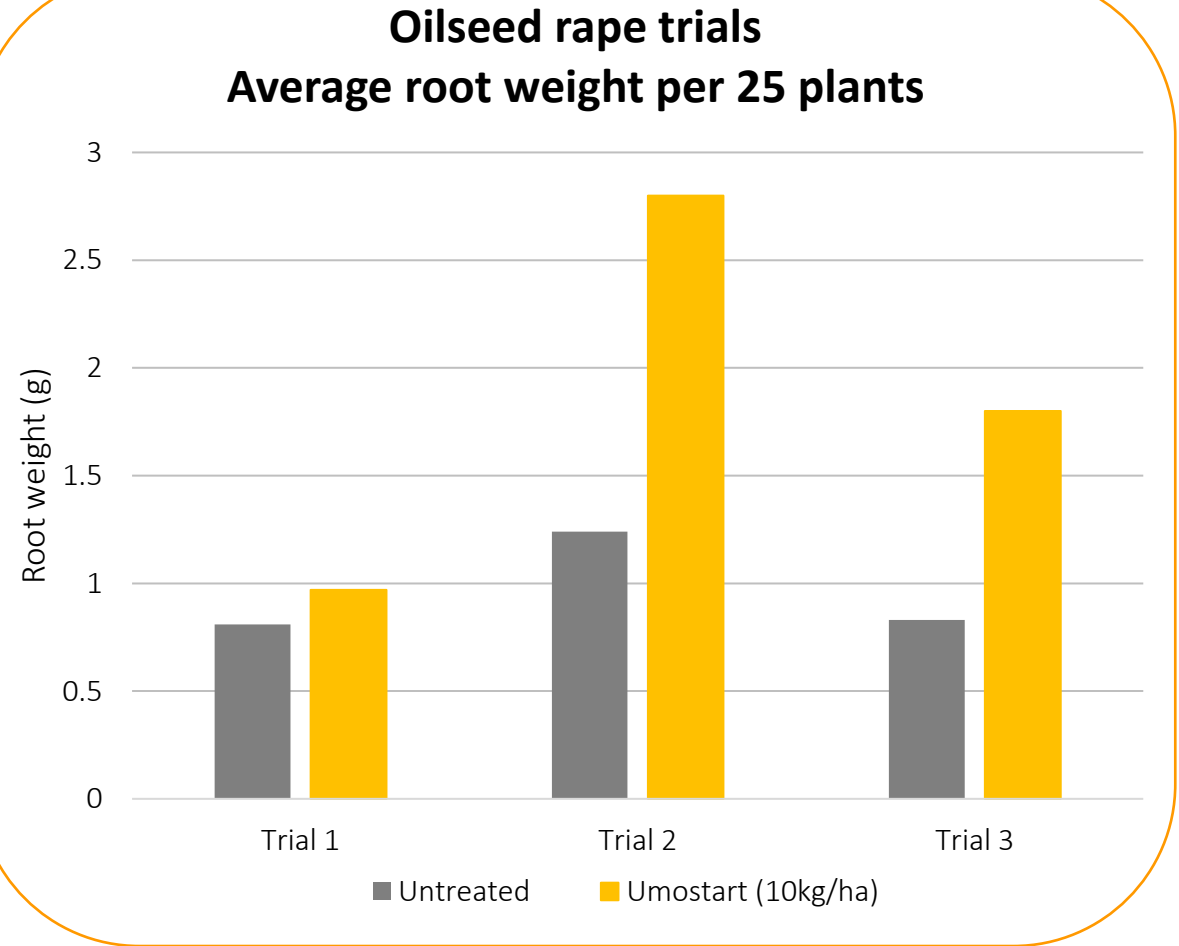

## Oilseed Rape

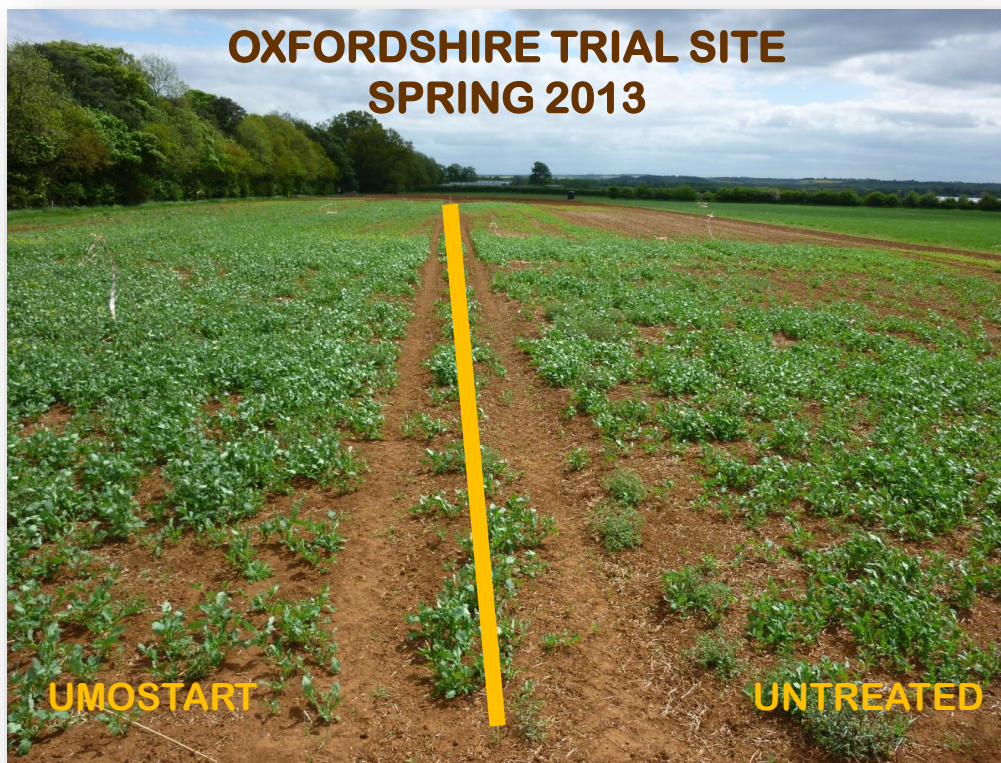

# Benefits in Oilseed Rape

- Quality micro-fertiliser placed with the seed for **stronger and quicker root development**
- Precision application offers **higher plant uptake, at lower application rates**
- **More reliable establishment**, especially in difficult seasons
- **Increases no. pods** per plant
- Can be used in all sowing regimes (except autocast & broadcast)
- Includes Nitrogen, removing the requirement for extra applications & saving costs
- Low application rates means easier and more cost-effective logistics

# Stronger Root Development

	AV.ROOT LENGTH CMS	AV.ROOT WEIGHT GMS	TOP PLANT WEIGHT GMS	POD NOS /PLANT	STEM SIZE
UNTREATED	5.07	0.96	13.12	96.03	2.20
TREATED	6.23	1.85	17.54	145.67	2.41
<b>% DIFFERENCE</b>	<b>123%</b>	<b>193%</b>	<b>134%</b>	<b>152%</b>	<b>110%</b>

# Reliable Establishment

## *Early drilled crops*

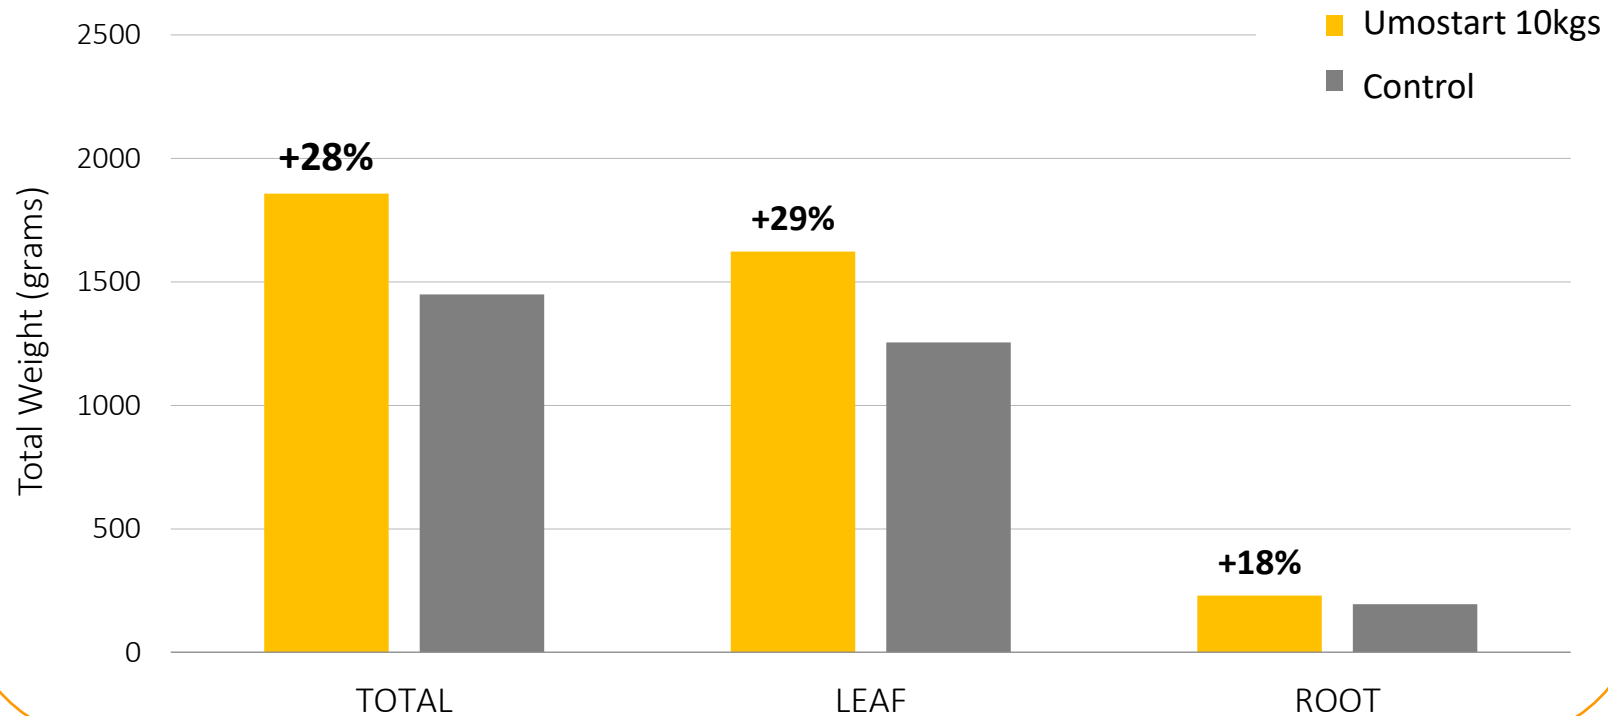

### Oilseed rape development across 8 varieties

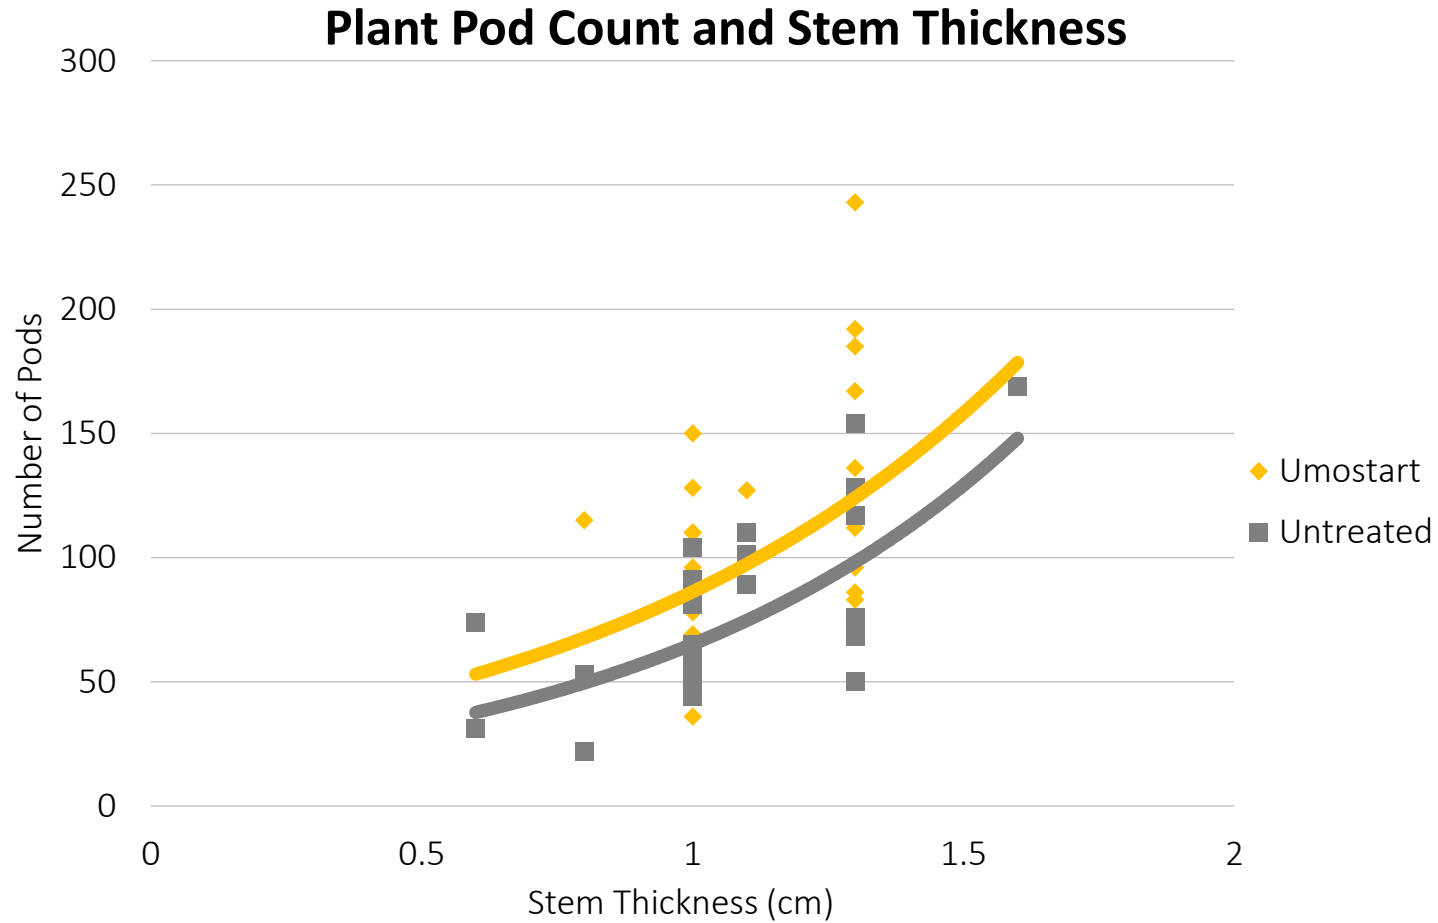

# Reliable Establishment

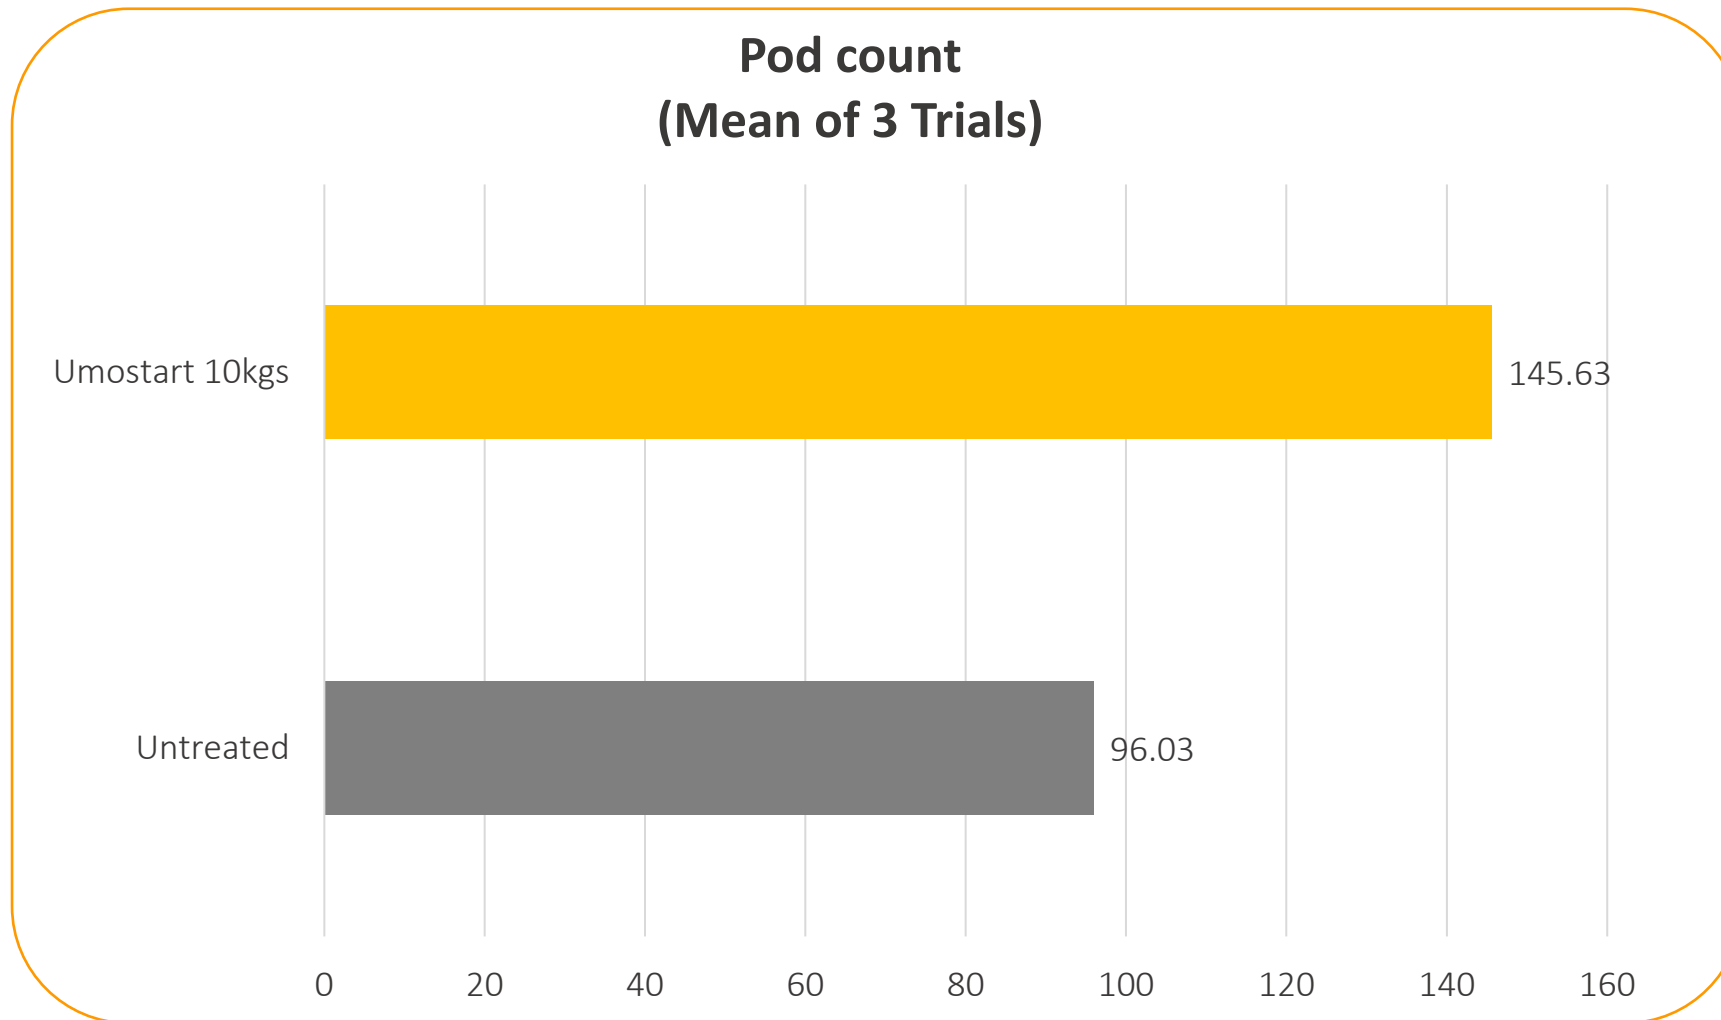

## *Later drilled crops*

### Oilseed rape development across 8 varieties

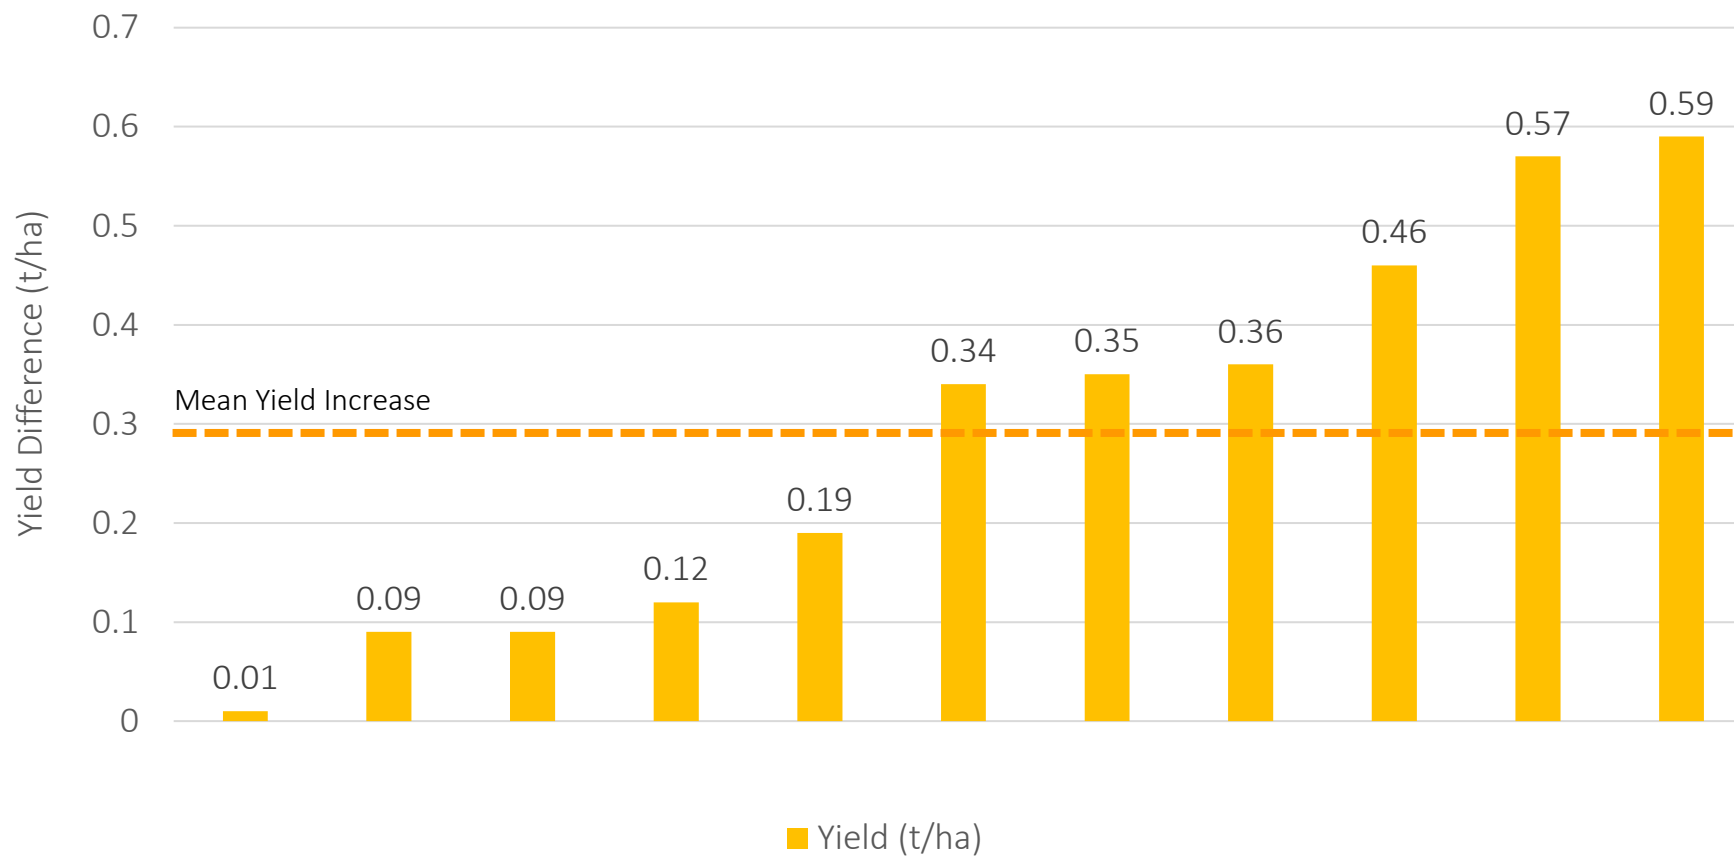

# Stronger & More Productive

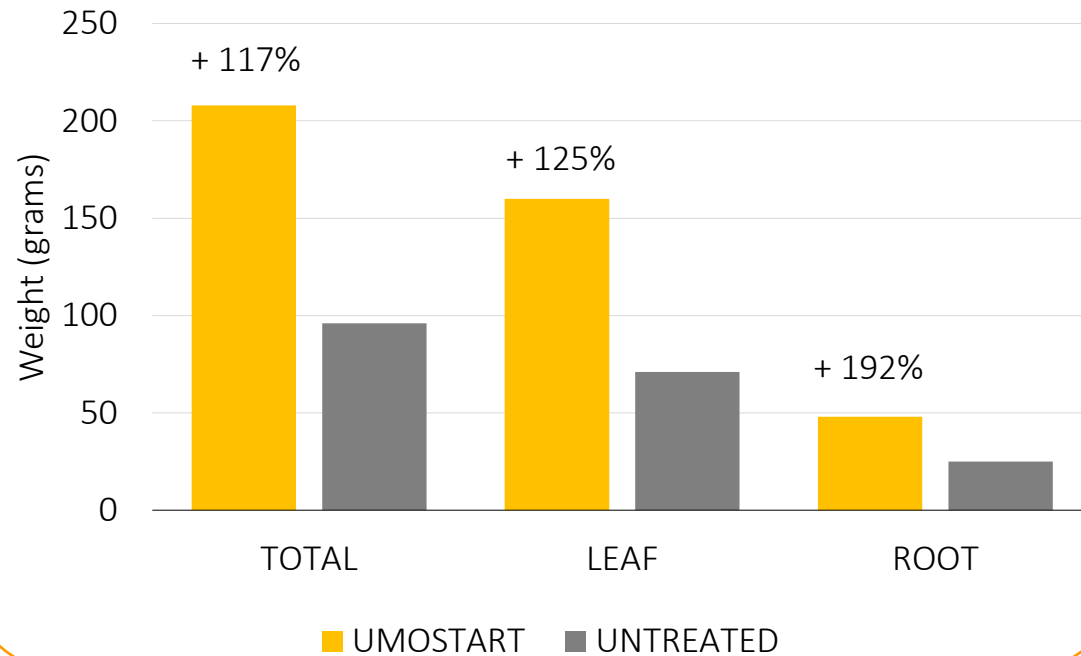

## Yield Difference vs. Control over multiple varieties
