

RAIKIRI

Suspension Concentrate containing 100g/L mesotrione

RAIKIRI

**A selective herbicide for the control of
annual broad-leaved weeds**

- For use on forage maize and grain maize when crop is between 2 to 8 leaves unfolded
- Raikiri is absorbed by the weed foliage and works mainly via uptake through the leaves
- Flexible rate for control of black nightshade, charlock, amaranth, chickweed, fat hen, field pansy and volunteer oilseed rape
