

VERTIPIN

1) Mix preparation :

- Before application, ensure sprayer is cleaned with no residue from previous application
- Fill the tank $\frac{3}{4}$ full with water
- Keep constant agitation while filling
- Shake VERTIPIN can thoroughly
- IF using in tank mix, pour VERTIPIN in tank first
- Rinse the empty can several times

2) During application :

- Spray as soon as your mix is ready
- Do not interrupt spraying as long as possible
- If the application is interrupted, continue agitation
- Application with minimum water volume $\geq 50\text{L} / \text{ha}$ with pressure $> 1.5 \text{ bar}$

3) After application :

At the end of each application of the product, the entire device (tank, boom, circuit, nozzles, etc.) must be rinsed with clean water and using a suitable cleaning product.
