

# Perfectose

A 100% plant based amino acid biostimulant

## Composition:

L-Free Amino Acids: 10% w/w

Nitrogen (N) total: 6.6% w/w

Distributor:  
Sipcam UK Ltd  
4c Archway House,  
The Lanterns  
Melbourn Street,  
Royston,  
SG8 7BX  
Tel. +44 (0) 1763 212100

Manufacturer:  
Sofbey SA  
Cso S.Gottardo 34  
Chisso - 6830 CH  
Tel. +41 91 22 31 090

BIOSTIMULANT

5L

Always read the label

Contains 2-methylisothiazol-3(2H)-one and octhlinone: may cause an allergic reaction.

### WARNING

Harmful to aquatic life with long lasting effects.

May cause an allergic skin reaction.

If medical advice is needed, have product container or label at hand.

Keep out of reach of children.

Avoid breathing vapours and spray.

Do not eat, drink or smoke when using this product.

Contaminated work clothing should not be allowed out of the workplace.

Avoid release to the environment.

Wear protective gloves, protective clothing, respiratory protection and eye protection.

**IF ON SKIN:** Wash with plenty of water.

If skin irritation or rash occurs: Get medical advice/attention.

Dispose of contents/container in accordance with local authority requirements.

PERFECTOSE is a 100% natural amino acid biostimulant from vegetative sources to improve the plants resistance to stress and aid recovery. PERFECTOSE is a biostimulant obtained from the fermentation of vegetal sources. Thanks to the selected raw materials and the mild production process it is rich in peptides, biologically active amino acids and molecules preserved in the natural bioactive form. The ready available amino acids and peptides are directly up taken by leaves and roots but also trigger beneficial microorganisms in the soil.

When applied as a soil application PERFECTOSE can reduce abiotic stresses such as drought, heat, frost, transplanting and aid crop recovery, or as a soil improver.

## DOSAGE AND RECOMMENDATIONS

CROPS	DOSE	RECOMMENDED GROWTH STAGE	NUMBER OF APPLICATIONS	INTERVAL
Vegetables	4.0-6.0 L/ha	From 7-10 days after transplanting (soil and foliar)	2-6	7-14 days
Fruit trees	70mL in 2L water	Soil application at full shooting	1	-
	50mL in 2L water	Soil application post-harvest	1	-
	2.0-4.0 L/ha	Folar application at early shooting or following abiotic stresses	2-4	7-14 days

### MIXING ADVICE

PERFECTOSE is compatible with crop protection products and/or fertilisers found on the market, but due to the wide variety of products, if mixing, first perform a compatibility jug test.

### STORAGE ADVICE

Store the product in a cool, dry and ventilated place. Protected from direct heat and sunlight. Protect against frosts. Shake well before use.

Dispose of the packaging in compliance with standards in force. The empty container must not be released into the environment and must not be reused.

### SIPCAM UK LTD CONDITIONS OF SUPPLY

All goods supplied by us are of high grade, but as we cannot exercise control over their mixing or use, all conditions or warranty, statutory or otherwise, as to the quality or fitness of our goods for any purpose are excluded and no responsibility will be accepted by us for any damage or injury whatsoever arising from their storage, handling, application or use.
