

BUCCANEER

BUCCANEER

Emulsifiable concentrate containing 180 g/l Clethodim

BUCCANEER

Post emergence herbicide for the control of annual grasses

- Absorbed through the leaves and translocated to the roots
- When targeting annual grasses apply at 0.7L/ha from 2-3 leaves stage until tillering
- Apply Buccaneer in 200-400 litres of water per hectare as a fine or medium spray.
- Ensure good coverage of the target weeds
